Dear Mr. Greg Oberlie:

It has come to my attention that E.P.A., during its groundwater study in Pavillion, Wyoming area had made some observations and comments on the contaminated pits. One of the pits (44-11) is west of my house one quarter mile and on property I own.

I would like a copy of these comments and any links to data that may have been collected at these sites. I was also told by Amanda Moyer, Wyoming DEQ, that my requests for the latest sample results on the monitor well surrounding that pit would not be released by Encana until reviewed by their attorneys.

Thank you for your consideration in this matter.

Sincerely,

Jeff Locker
